

Cool Folding Gift Box

This nifty little box folds fast and easy to make a tiny gift box. Perfect for little goodies, trinkets, sorting small things and hanging on a holiday tree.

Folding lines are dotted

Heavy cutting lines

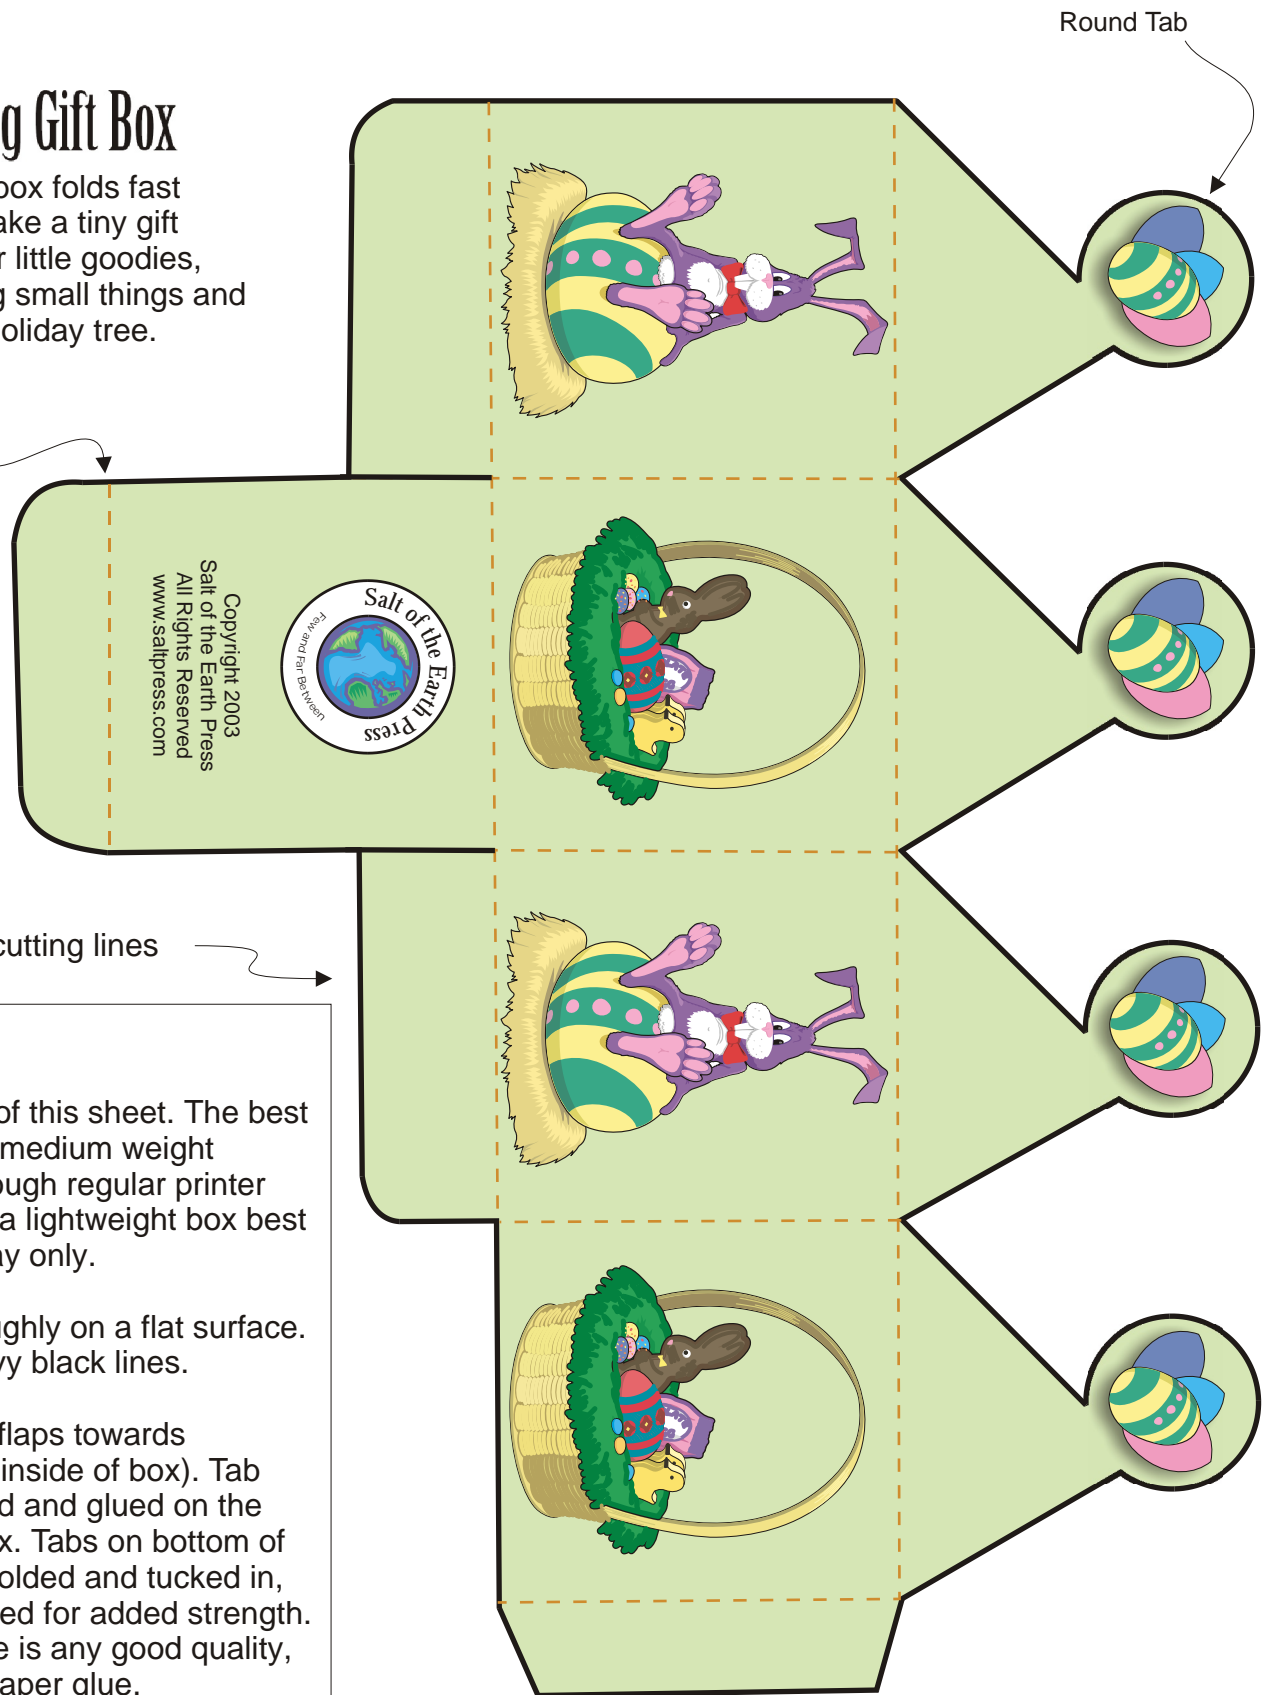

Instructions:

Print one copy of this sheet. The best paper to use is medium weight cardstock, although regular printer paper will yield a lightweight box best suited for display only.

Let it dry thoroughly on a flat surface. Cut out on heavy black lines.

Fold sides and flaps towards unprinted side (inside of box). Tab should be folded and glued on the inside of the box. Tabs on bottom of box should be folded and tucked in, and may be glued for added strength. Best glue to use is any good quality, white, craft or paper glue.

Let dry completely before folding all sections of top inward and latching over round tabs,

Tab
